

ABOUT US

We offer rides for the general public as well as specific populations within Shawnee County. If you need a ride, please contact one of these transportation providers based on where you live and what type of service you require.

Each provider has different service areas, service hours, fares and reservation requirements. Trips can be made for medical, personal business, education, shopping, employment, or other reasons. Transportation is provided not only to older adults and people with disabilities, but also to the general public.

Contact the provider to schedule your trip, or to find out more information.

You can also go online to www.ksrides.org to find information for any county in Kansas.

"Transit is not just a social service. Transit is an economic development initiative, an economic development asset."
~Hunter Morrison

Public transportation is accessible and affordable in north east Kansas.

Our goals include:

Promoting Independence: Maintain the quality of life for individuals who live in our communities and increase awareness and perception of transportation services.

Building Connections - Improve the efficiency and effectiveness of transit service so more Kansans can be served and increase the level of communication, cooperation and coordination among existing providers.

Preserving Rural Living - Allow Kansans to stay within their current communities and increase and enhance the level of connectivity between activity centers (i.e., cities, major employers, major medical facilities).
